

A Simple Enterprise Solution Customized To Fit Application Requirements

Achieve Terabyte Capacities For Backup & Disaster Recovery, Near-Line Removable Storage or Replacing Tape Libraries

◆ CUSTOMIZED FOR REQUIREMENTS

The Mobile DataVault Enterprise / Custom System is a custom-configured solution built to meet a wide range of application requirements.

◆ ULTRA-FAST TRANSFER SPEEDS

The Mobile DataVault Enterprise / Custom System is available with high-speed interfaces such as Firewire 800, SATA and SCSI.

◆ RELIABILITY BACKED BY A 3-YEAR WARRANTY

Olixir's products are built for maximum reliability and come backed by a 3-year warranty. The warranty even covers accidental drops, which is something no other manufacturer will cover.

◆ HIGH CAPACITY

Capacities range up to 750GB per drive – Easily achieve Terabyte-capacities.

◆ INFINITELY EXPANDABLE

Utilize higher capacity Mobile DataVault drives, add additional drives or daisy chain multiple systems to easily expand storage capabilities as data requirements increase.

◆ EASILY AND SAFELY TRANSPORT DATA

Mobile DataVault Drives are rugged and transportable, making them safe to transport. Push button docking bays allow for easy hot-swap insertion/ejection of drives.

◆ PLUG-AND-PLAY EASE OF USE

Plug-and-Play with Windows 2000/ME/XP; Compatible with Macintosh OS 8.6 & higher; Compatible with Linux OS. Everything needed for installation and setup is included.

◆ AWARD-WINNING BACKUP SOFTWARE

Available with award-winning EMC® Insignia® Retrospect Disk-to-Disk backup and disaster recovery software for easy and efficient data backups. Also compatible with most popular backup software packages such as Symantec® (Veritas) Backup Exec.

4-Bay Desktop Tower Shown

PRODUCT DESCRIPTION

Mobile DataVault Enterprise / Custom Systems are built for a variety of different application requirements such as backup and disaster recovery, adding removable near-line storage or replacing tape libraries. These systems utilize Mobile DataVault Transportable Drives, which feature 1,200 Gs of patented shock and vibration protection. Plug-and-play installation and push-button hot-swapping (most interfaces) of drives makes this a truly easy-to-use solution. This scalable solution is infinitely expandable and compatible with Olixir's full line of Mobile DataVault Drives, allowing unlimited versatility when choosing configurations or increasing capacity. System is available in Desktop Tower or Rackmount Chassis configurations and can be configured with optional RAID. All solutions are backed with a 3-year warranty and are available with EMC® Insignia® Retrospect backup and disaster recovery software for easy and reliable backups.

CHOOSE FROM SEVERAL CONFIGURATIONS:

- ◆ Desktop Tower / Chassis
- ◆ 19" Rackmount Chassis
- ◆ RAID 0, 1, 5, JBOD or Separate Volume
- ◆ Single or multiple drive bays
- ◆ Choose drive capacities and number of drives

FLEXIBLE INTERFACE OPTIONS:

- ◆ USB 2.0 ◆ Firewire 400 / 800
- ◆ SATA ◆ SCSI
- ◆ Other Configurations / Combination Interfaces

PRODUCT SPECIFICATIONS

Mobile DataVault Enterprise / Custom System*

* Specifications may vary based on drive capacity and system type

FastRestore SE Chassis

Interface Compatibility USB 2.0 & Firewire 400/800, SATA, SCSI

Operating System Compatibility Windows 2000/ME/XP; Macintosh OS 8.6 & higher; Linux OS

Expandability Higher capacity drives or daisy-chain multiple systems

Mobile DataVault Drives

Model Mobile DataVault 3DX Transportable Series (Also compatible with Mobile DataVault 2LX Ultra-Rugged Series)

Capacity (Per Drive) 160/250/400/500/750GB

Shock (Operating) 200 Gs / Half-Sine Wave, 2.0 ms

Shock (Non-Operating) 1,200 Gs / Half-Sine Wave, 2.0 ms

Dimensions (H x W x L) 1.40 in. x 4.45 in. x 7.5 in.

Software

EMC® Insignia® Retrospect Disk-to-Disk Backup Software

Warranty

3-Years

8-Bay Rackmount Chassis Shown

INTERFACE OPTIONS:

- **USB 2.0**
Burst Transfer Rate: 480 Mbps
- **Serial ATA (SATA) - Supports eSATA**
Burst Transfer Rate: 1,500 Mbps
- **Firewire 400/800**
Burst Transfer Rate: 400/800 Mbps
- **SCSI**
Burst Transfer Rate: 160 MB/s and higher (depending on SCSI type)

LEARN MORE ABOUT OUR COMPLETE LINE OF MOBILE DATAVAULT 3DX TRANSPORTABLE EXTERNAL HARD DRIVES

The Mobile DataVault Enterprise / Custom System uses Mobile DataVault 3DX Transportable External Hard Drives for a reliable, high-performance solution. These drives feature 1,200 Gs of patented shock and vibration protection and can be used stand-alone or as part of a larger system for different applications. Datasheet available from www.olixir.com.

Also Available: The Mobile DataVault 2LX Ultra-Rugged External Hard Drive with Military-grade shock and vibration protection (over 10,000 Gs). This model is also compatible with all of Olixir's larger systems.
